### About This Content

Faeria: Chronicles of Gagana introduces 40 BRAND NEW cards to add to your collection.

Emperor Kaios has been defeated and the Oversky is saved.

This victory is short-lived, however, as the climate begins to slowly deteriorate, and extreme winds soon blow over the globe.

In search for a solution to the new, impending cataclysm, the crew of the Gagana ventures out into uncharted territory.

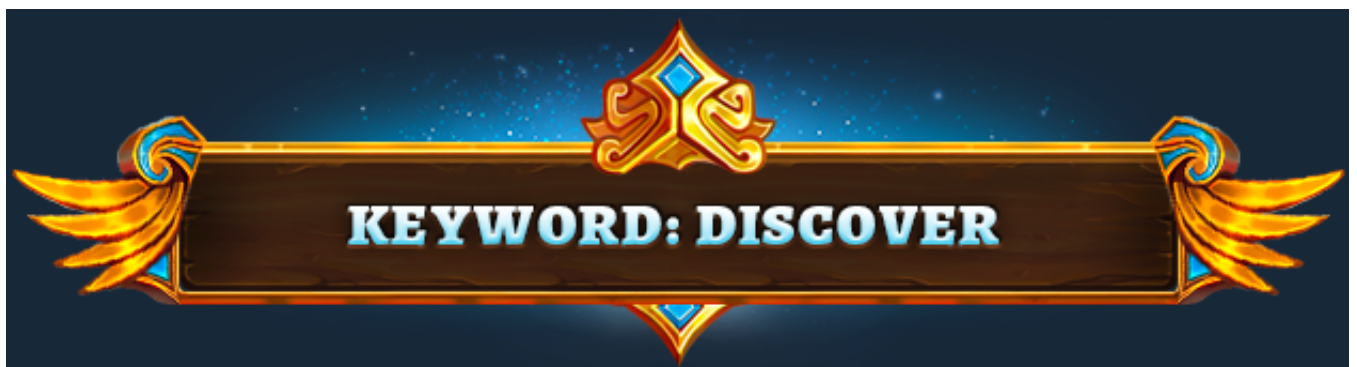

They will encounter new civilizations, new continents, new creatures.... and in the end: the Treasures of Gagana.

*Chronicles of Gagana is the first part of a trilogy.*

Find and accumulate powerful new Treasure cards that can also be played in Pandora mode.

Discover cards embrace the core theme of exploration and discovery.

## NEW MECHA SUBTYPE

The Mecha are a brand new subtype introduced with the Chronicles of Gagana. The Mecha are a sentient race of machines that the crew of Gagana will encounter on their voyages.

Chronicles of Gagana includes a brand new battlefield background, or shore, which represents the capital city of the Mecha - Heartforge.
